

## Micro Solid Carbide End Mills

# Micro Solid Carbide End Mills

Micro solid carbide end mills offer plunging, slotting, profiling, and 3D milling for a wide range of materials and applications. They are designed to provide efficient machining in a wide range of steel, cast iron, copper and copper alloys, and aluminium materials. Micro square and ball nose tools, designed for the most demanding end users, offer exceptional tool life and precision at high speeds and feeds.

- 2-flute ball nose and 2–3 flute cutters with sharp corner.
- Micro tools for a wide range of materials.
- Roughing and finishing in one tool.
- Diameter range from 0.4–3mm.
