SuperFeed™

The new SuperFeed face mills and end mills are the first choice platform for machining aluminium in the transportation and general engineering industries.

SuperFeed

Our unique insert design delivers exceptional stability and performance. Reduced complexity with exceptional finishing capabilities make SuperFeed the go-to platform in aluminium and non-ferrous face and end milling applications.

- Durable cutter body protection.
- Five PCD cartridge options for increased flexibility.
- User-friendly axial adjustment 0,3–0,8mm.
- Reduce overall tooling costs with reconditioning options.

| Features | Benefits |
|------------------------------------------|-----------------------------------------------------|
| • Anodised aluminium cutter bodies. | • Durable and lightweight. |
| • Easy axial adjustment range 0,3–0,8mm. | • Simple and very user-friendly. |
| • DovLok™ PCD cartridge design. | • Proven in demanding automotive applications. |
| • Fine pitch cutters. | • Shorter cycle times, higher MRR and productivity. |
